2. Claims 1-10 are pending and have been examined.

Allowable Subject Matter

3. The following is an examiner's statement of reasons for allowance:
 - claims 1-10 are allowed;
 - regarding independent claim 1, the prior art of record neither alone nor in combination teach "a decoder circuit which decodes the license information stored in said nonvolatile memory unit, and makes each of the internal hardware function blocks separately either usable or unusable depending on the decoded license information in response to information that is kept inside the semiconductor integrated circuit and indicates at least one of a current date and time and a number indicative of how many times one of the function blocks is used" in combination with the other limitations recited in independent claim 1;
 - claims 2-10 are allowed because of their dependence from independent claim 1.
